Trail Name: Accord Path

Section Name/Description:

Work Completed (Please be specific with location of work. Note hazards & potential hazards addressed if applicable):

Brushed length of trail of brush and overhanging branches - many white pines. Installed near grade reversal about 80 yards west of pumphouse. Cut into trench that ran along trail and directed water flow across the trail. Installed rockwork near pumphouse to stabilize trail and improve water flow across the trail. Cleaned outflow ditch to allow water to move away from the trail. Improved waterbar about 200 yards before Skyline Trail. There is a series of waterbars in this section.

Total Hours (# of people x hours worked): 83.00

Work Remaining:

Should improve the trail near the pumphouse by reestablishing a retaining wall on upslope side. Many rocks have fallen from the trailside and collected in the middle of the trail.

Other comments (areas of concern, wildlife sightings, trail markings and signage condition, need for re-route, possible encroachment):
