Work Remaining:

Other comments (areas of concern, wildlife sightings, trail markings and signage condition, need for re-route, possible encroachment):

The first grade reversal on the Burnt Hill Path, as you proceed UPHILL from 2092, should probably be shored up on the downhill side. In it's current condition, a lot of the water is probably draining down the trail, as there is no rise on the back side of the reversal to keep water in the off-trail channel.
