Work Completed (Please be specific with location of work. Note hazards & potential hazards addressed if applicable):

With the help of DCR staffer, John Jacoppo, and his backhoe, we excavated and replaced one failed culvert. A new culvert was placed across the trail and new rock walls were built at each end. The side trench on the west side of the trail was dug out and two new rock-lined basins were created to collect water at the entrance to two of the three existing culvert locations. Brush was cleared on the east side of the trail at the culvert runout area. Additional crushed stone and soil mix was added to the trail surface.

Total Hours: 35.00

Work Remaining:

DCR staff will bring additional crushed stone to the site for catch basins and material to complete trail surface regrading
