Blue Hill 1000's

Work Completed (Please be specific with location of work. Note hazards & potential hazards addressed if applicable):

Removed blow-down limbs from trail, and resolved classic case of poor trailwork, halfway between 1081 and 1093. A pine tree had been cut, thigh high, leaving a stepped and jagged stump. The main trunk of the tree was left along the edge of the trail with branches sticking into the trail, and the top was just barely off trail with the cut facing the trail. Somebody needs training!
