

Adopt-a-Trail Volunteer Work Report

Work Date: **4-27-2008** Report date: **4-28-2008**

Name of Adopter: **Robert Romeri**

List Volunteers working with Adopter: **None**

Trail Name: **Sawcut Notch Path**

Section Name/Description: **Quarry Section 4000**

Work Completed (Please be specific with location of work):

Brushed Sawcut Notch path from trailhead to the notch (just past Short Path). Cut back wild rose bush at the notch from trail. Removed two small blow downs from trail. DCR apparently removed all the blow downs from the trail (the blow downs were there in March) Brushed out the Minichiello foot bridge (bridge needs attention).

Total Work Hours: **3.5 hrs**

Work remaining: Sawcut Notch path at the notch (near Short Path) needs to be assessed as to the best way to restore and harden the trail. I believe the one way is to move the loose stones and build a curb along both edges then have the DCR bring in gravel to fill and build up the middle. The trenches along the side will need to be directed at the Short Path intersection. This may involve a culvert although ledge is close to the surface in this area and that may not be an option except with heavy equipment. This probably needs some minds put together to determine the best solution.

The Minichiello Bridge needs planks added (~8).
